

THE VIBRANT MIND

EMBRACING MENTAL HEALTH
THROUGH ARTISTRY

2023-2024

Project objectives

What we aim to achieve

To create a truly pan-European art exhibition for those living with different mental health conditions where they will be able to exhibit their art pieces around different beautiful European spaces in a wide variety of European countries and cities.

This project, therefore aims to:

- Showcase all the artworks for some time within the exhibition spaces and disseminate them via all our networks where people in different countries can go to check out the art and thereby create visibility and encourage a conversation around the connection between art and mental health
- Increase awareness of those living with different mental ill-health conditions in as many European countries as possible with the aim of breaking down stigma wherever possible
- Create greater collaboration with member associations of GAMIAN-Europe as well as other relevant organisations and individuals through the involvement of the people with mental health conditions they represent.
